

METHODS, AND WIRELESS TERMINALS AND SYSTEMS FOR ACQUIRING  
SERVICE USING STORED TDMA DIGITAL CONTROL CHANNEL  
INFORMATION

5 ABSTRACT OF THE DISCLOSURE

Methods for acquiring service for a wireless terminal can include the steps of  
camping on a control channel and receiving a request for an operation to be performed  
by the wireless terminal that is performed by the wireless terminal mutually exclusive  
of camping on the control channel. Control channel information associated with the  
10 control channel on which the wireless terminal was camped is stored and the  
requested operation is performed. The stored control channel information is used to  
acquire service for the wireless terminal. Related wireless terminals and systems are  
disclosed.
